#### Food Raising Standards

Advertising is playing a won-derful part in the raising of food standards because it has opened the way for distributing standard brands of assured quality.

Article for article, the advertised food products are of bet-ter character than the unknown They are kept to a fixed

standard all the time. Food products advertised in this newspaper are deserving of confidence; and the stores which specialize on these brands and co-operate with the manufacturers in giving them distribution are well worthy of

your confidence.
